

June 2016: Site C Construction and Environmental Contractors' Job Groupings

Since construction started in summer 2015, BC Hydro's Site C Clean Energy Project has been creating jobs for British Columbians. In the coming months and years, many more jobs will be created as main civil works increases activities, and as major contracts get underway for turbines and generators, transmission and the generating station and spillways.

The table below shows¹ the latest Site C Construction and Environmental Contractors numbers², broken down by job groupings. As with any construction project, the number and type of workers will vary due to the seasonal nature of construction work and the type of work performed.

The data below is reflective of construction and environmental contractors that are required to provide job classification data. Job classification data not required by contractors is also noted. Data provided by Site C contractors are subject to revision. Data not received by project deadline may not be included in the numbers.

¹ Employment numbers are direct only and do not capture indirect or induced employment.

² Construction and Environmental Contractors includes work performed on Site C dam site, transmission corridor, reservoir clearing area, public roadwork, worker accommodation and services, and onsite office staff.
