

Site C Employment by Month: May 2016

Since construction started in summer 2015, BC Hydro's Site C Clean Energy Project has been creating jobs for British Columbians. In the coming months and years, many more jobs will be created as main civil works increases activities, and as major contracts get underway for turbines and generators, transmission and the generating station and spillways.

The table below shows the latest Site C employment numbers.¹ As with any construction project, the number of workers — and the proportion from any particular location — will vary month-to-month and also reflects the seasonal nature of construction work.²

Site C Employment Statistics – May 2016			
	# of Total Workers	# of BC Primary Residents	% of BC Workers
Construction and Environmental Contractors³ <i>Excludes work performed outside of B.C. (e.g., Manufacturing)</i>	1,146	893	78%
Engineers and Project Team⁴	401	330	82%
Total Workforce⁵	1,547	1,223	79%

Employment numbers provided by Site C contractors and consultants are subject to revision.

¹ Total employment numbers are indicative only as they do not capture indirect or induced employment. The Construction and Environmental Contractors numbers excludes work performed outside of B.C. (e.g., manufacturing).

² During the month of May 2016, there were no workers from the Construction and Environmental Contractors working under the federal Temporary Foreign Worker Program. There were approximately 11 management and professional employees working under the federal International Mobility Program.

³ Includes work performed on Site C dam site, transmission corridor, reservoir clearing area, public roadwork and office staff in the Peace River Regional District.

⁴ Project Team includes consultants, BC Hydro Construction Management and other offsite Site C project staff. An estimate is provided where possible if primary residency is not given.

⁵ Data not received by project deadline may not be included in the above numbers.
