

FIELD STUDIES INFORMATION SHEET

Traffic Counts: October and November 2014

The Site C Clean Energy Project is currently undergoing a cooperative environmental assessment by the Canadian Environmental Assessment Agency and the B.C. Environmental Assessment Office. BC Hydro is continuing to conduct environmental and engineering field studies on and around the Peace River between the Williston Reservoir and the Alberta border to inform detailed mitigation and monitoring planning. Project construction will not take place unless Site C receives environmental certification, regulatory permits and authorizations, and approvals to proceed.

During the months of October and November, BC Hydro is conducting traffic counts at key intersections in Fort St. John, Taylor, Hudson's Hope and Chetwynd to establish current levels of traffic volume. Video recording equipment will be mounted on utility poles or signal poles at 19 locations to collect vehicle turning data. There will be no disruption to traffic or traffic operations during this activity.

Traffic counts will be conducted at the following locations:

- Canyon Drive / Beattie
- Highway 29 / Clarke
- Highway 29 / Farrell Creek Rd
- Highway 97 / Highway 29N
- Highway 97 / 271 Road
- Highway 29 / 269 Road
- Highway 97 / Old Fort Road
- Highway 97 / 100 Street
- Highway 97 / 85th Avenue
- Highway 97 / 86 Avenue
- Highway 97 / Western Bypass
- Highway 97 / Highway 29S
- Highway 97 / Jackfish Lake Road
- Old Fort Road / 242 Road
- Old Fort Road / Alaska Road
- Old Fort Road / 85 Avenue
- Old Fort Road / 240 Road
- 240 Road / 269 Road
- 85th Avenue / 100 Street

Field study updates are available at www.sitecproject.com and in the Community Consultation offices in Fort St. John and Hudson's Hope.
