Construction update: Geotechnical investigations in Hudson's Hope

Dear neighbour,

We are writing to let you know about upcoming Site C work taking place in your community.

Starting the week of September 23, we will be conducting geotechnical investigations in various locations throughout Hudson's Hope. The purpose of this work is to install and commission groundwater monitoring wells.

We will be drilling small test holes at groundwater sample sites in different locations. Crews will be at each site for approximately two to three days.

Investigations, tests and installations of groundwater monitoring wells will continue until the end of October.

What to expect

- Increased noise and vibration from drilling and hydrovac trucks. Noise levels will be similar to construction noise.
- Traffic control personnel and signage.
- Work is expected to occur 7 am – 7 pm from Monday to Saturday and 10 am – 7 pm on Sunday.
- No interruption in utility services will occur due to this work.

Thank you for your patience as we complete this work. Please feel free to contact us with any questions or concerns.

Sincerely,

Site C project team
