

## Custom Venting Forecast

Company: Frost Group  
 Burn Reg. Number(s): On file  
 Issued: Tuesday, December 07, 2021  
 FOR BURNING ON: Wednesday, December 08, 2021

### Synopsis:

**Wednesday:** A system moves through the region, maintaining instability. With moderate winds, venting expected to be good.

**Thursday:** A weak arctic ridge starts to develop again, bringing more stable conditions. With moderate winds lingering, venting is expected to be fair.

**Friday:** A strong system impacts the north coast, pushing instability ahead of it into the interior. With increasing winds, venting is expected to be good.

**Comments:** Categories appear to be solidifying for Wednesday and Thursday, with the arctic ridge expected on Thursday remaining fairly weak which allows for fair categories to remain. We could see some adjustments around the system on Friday as well, however for the moment it appears to impact the region later in the day.
