1.0 Background

The Site C Clean Energy Project (the project) is a hydroelectric dam and generating station under construction in northeast B.C. Construction started in July 2015 and the project is now in service. The project will help meet future electricity needs by providing 1,100 megawatts of dependable capacity and producing about 5,100 gigawatt hours of energy each year — enough to power the equivalent of about 500,000 homes per year. The project will be a source of clean, reliable and cost-effective electricity in B.C. for more than 100 years.

The key components of the project are:

- Access roads and a temporary construction bridge across the river, at the dam site.
- Worker accommodation at the dam site.
- Upgrades to 240, 269, 271 and Old Fort roads.
- The realignment of seven segments of Highway 29.
- Two temporary cofferdams across the river to allow for construction of the earthfill dam.
- Two new 500 kilovolt transmission lines connecting Site C to the Peace Canyon Substation, within an existing right-of-way.
- Shoreline protection at Hudson's Hope, including upgrades to DA Thomas Road.
- An 800-metre roller-compacted-concrete buttress to enhance seismic protection.
- An earthfill dam, approximately 1,050 metres long and 60 metres high above the riverbed.
- A generating station with six 183 MW generating units.
- An 83-kilometre-long reservoir that is, on average, two-to-three times the width of the current river.

With the Site C project coming into operation, this is the final Construction Communications Annual Report.

2.0 Environmental Assessment Certificate Requirements

The Site C Construction Communication Plan (the Plan) has been developed in accordance with the Conditions 39, 43 and 72 of the Environmental Assessment Certificate (EAC), and guides construction communications and community relations during the construction phase.

This annual report provides a review of the construction communications activities undertaken as part of the Plan during the third year of construction. Note that the reporting period covered by this annual report is **July 1, 2024 – June 30, 2025**.

Table 1 describes how BC Hydro is meeting the EAC Conditions that relate to the Plan.

Table 1. EAC Conditions Addressed in the Construction Communications Plan

Condition Number	Condition	Plan Reference
EAC Condition 39	The EAC Holder must provide information to the Province of Alberta, during construction and operations, to assist in their communications with anglers in Alberta regarding changes in downstream fishing opportunities due to construction activities and longer-term changes in fish community composition.	BC Hydro has provided regular communications with downstream communities, including the Province of Alberta, about reservoir filling and the project coming into operation.
EAC Condition 43	The EAC Holder must develop an Emergency Services Plan that includes at least the following to describe how the EAC Holder will implement measures to: Communicate project emergency management plans to all emergency service providers and provide updates as plans are amended.	BC Hydro is meeting this condition. BC Hydro Site C Emergency Action Plan is reviewed and updated regularly.
EAC Condition 72	The EAC Holder must manage effective communications for the Project by implementing measures in communication plans and a business participation plan. The following communication and participation plans are to be developed and implemented: <ul style="list-style-type: none"> • Business Participation Plan; • Construction Communication Plan; and • First Nations Communication Plan. Each plan in addition to plan specific conditions identified in this document will include: <ul style="list-style-type: none"> • Clear Statement of Objectives; • Audiences; • Key activities and tools; and • Annual summary reporting. 	BC Hydro is meeting this condition. The following plans have been developed and are actively being implemented. <ul style="list-style-type: none"> • Business Participation Plan; • Construction Communication Plan (Appendix C); and • Aboriginal Group Communication Plan (Appendix D).

2.1 Construction Communications Plan Structure

Consistent with EAC Condition 72, the [Construction Communications Plan](#) provides the following items:

- A clear statement of objectives,
- Audiences,
- Key activities and tools, and
- The requirement to provide annual summary reporting.

2.2 Implementing the Construction Communications Plan

In order to implement the Construction Communications Plan and achieve the goal of keeping members of the public and project stakeholders informed about current and upcoming construction activities, a variety of key activities and tools are being used.

These key activities and tools cover a range of items to ensure a broad distribution of construction-related information. In addition, information and notification will be provided through ongoing community relations, as well as Indigenous group engagement and consultation. Please refer to the [Aboriginal Group Communication Plan](#) for more information about how construction information is being shared with Indigenous Nations.

During this reporting period, Site C construction included reservoir filling, and assembly and commissioning of generating units.

Off-dam site work included construction of boat launches and recreation sites at Halfway River, Lynx Creek and D.A. Thomas Road; and reclamation activities.

Construction communications activities were ongoing including numerous meetings and presentations with Indigenous Nations, community groups, and stakeholders.

The key activities and tools listed below have been implemented to meet the specific objectives of the Plan. Please see the report appendices for detailed information.

Status of Construction Communications Plan Activities, July 2024– June 2025		
Construction Communications Activities		
Activity or Tool	Purpose (as stated in the Construction Communications Plan)	Status During the Reporting Period (July 2024 – June 2025)
Project Website (sitecproject.com)	<p>The project website will be updated to include regular information about site preparation, early works and construction activities, as well as all construction-related information.</p> <p>This information is expected to include a construction schedule summary, a one-month look-ahead schedule for construction, and background information on construction. In addition, the website will include relevant project maps, a construction photo gallery, and information for businesses and workers.</p>	<p>The project website was updated frequently over the course of the 10th year of construction. The website was also updated to outline current and planned construction activities, as well as general construction-related information.</p> <p>This information has included biweekly construction bulletins and background information on construction activities. In addition, the website includes project maps, a construction photo gallery, project videos, and information for businesses and workers.</p> <p>Please see Appendix A for more information.</p>
Public Enquiries Program	<p>A public enquiries program has been developed to support two-way communication with members of the public and project stakeholders. This system includes a toll-free phone line, Site C email address, online enquiry form and staffed consultation office.</p> <p>Using these various methods, members of the public can receive up-to-date information about construction activities and provide feedback or comments about the project</p>	<p>The Site C communications team monitors all communications channels and tracks, reviews and responds to all public enquiries.</p> <p>295 public enquires were received and responded to during the reporting period of July 1, 2024 – June 30, 2025.</p> <p>Most enquiries in this reporting period have been related to ATCO decommissioning and general information.</p> <p>Please see Appendix B for more information.</p>

Construction Communications Annual Report
Site C Project

<p>Construction Bulletins</p>	<p>Site C construction bulletins will be developed, posted on the project website, delivered to key news outlets, and emailed to web subscribers. The construction bulletins will provide advance notification of construction activities, its potential impacts and duration.</p>	<p>Biweekly construction bulletins provided a two-week look ahead of upcoming construction activities both at the dam site and in other project areas, including potential impacts and duration.</p> <p>Two additional issues were distributed during reservoir filling, focused on progress updates and public safety. The bulletins were posted to the project website and sent to 5,933 public email subscribers, media, local and regional government contacts and other internal and external stakeholders.</p> <p>In the 10th year of construction, 14 construction bulletins were sent out and posted online (note, reporting period is July 1, 2024 – June 30, 2025).</p> <p>The Dec. 13, 2024 construction bulletin was the final issue on the project.</p> <p>Please see Appendix C for more information.</p>
<p>Letters, emails and mailings</p>	<p>BC Hydro will send notices by mail prior to the commencement of any work in close proximity of homes and/or businesses, as appropriate</p>	<p>Construction notification items were sent by mail to directly impacted residents, as needed.</p> <p>In the reporting period, no items required communication directly to residents and/or stakeholders.</p> <p>Two quarterly construction notification letters were sent to Indigenous Nations and local governments. The Nov. 29, 2024 letter was the final letter issued on the project.</p> <p>These letters are also posted on the Site C website.</p> <p>Please see Appendix D for more information.</p>

Construction Communications Annual Report
Site C Project

Information Materials	BC Hydro will develop public information materials on the construction phase, including an updated brochure, fact sheets and backgrounders	In the past year, information materials were developed and shared with the public email distribution list (5,933 subscribers), posted to the project website and distributed to local stakeholders and Indigenous Nations, as appropriate. Please see Appendix E for more information.
Media Relations	BC Hydro will inform local media outlets of key construction activities as part of its information and notification program.	The biweekly construction bulletins and the monthly employment statistics were shared with media outlets. In addition, 10 news releases, information bulletins and public advisories were issued about key construction milestones, community funding announcements and construction-related information (e.g., reservoir filling). Please see Appendix F for more information.
Social Media	BC Hydro will use social media networks, such as Twitter (X), to inform and notify key audiences about construction activities	The Site C Twitter (X) account was used during the reporting period. The account currently has 1,566 followers. Please see Appendix G for more information.
Signage	Appropriate signage will be placed at construction sites for the project, as well as on public roads and highways where construction activities are taking place	Signage at the dam site gates identifies the project and provides contact information for the project team. In addition, signage is used as necessary to identify active work areas and enhance public safety. This has included signage along the reservoir and tributaries prior to the start of reservoir filling. No appendix is required for this section.

Construction Communications Annual Report
Site C Project

Advertising	BC Hydro will advertise in local and regional media outlets to inform and notify key audiences about construction-related activities, prior to the start of work, as appropriate.	<p>The project advertised as needed to notify the public and stakeholders about construction work, safety programs, and permit applications.</p> <p>Advertising is also used to notify key audiences of events, meetings and construction-related activities, as appropriate.</p> <p>Please see Appendix K for more information.</p>
-------------	---	---

Community Relations Activities		
Activity or Tool	Purpose	Status During the Reporting Period (July 2024 – June 2025)
Community Consultation Offices	The project's community consultation office is in Fort St. The offices will be staffed throughout the construction phase to provide a location where the public can get information about the project, ask questions and submit feedback.	The Community Consultation Office in Fort St. John is open for meetings by appointment. No appendix is required for this section.
Neighbourhood Meetings	As appropriate, BC Hydro will meet with property owners near construction activity, prior to the work commencing, to provide information about schedule, work hours and activities. The meetings will also provide an opportunity to answer questions and hear feedback or concerns.	The Site C team met with property owners six times during this period. Please note that the Site C properties team contacted impacted property owners as required. No appendix is required for this section.
Open Houses, Community Events and Presentations	BC Hydro will hold public information meetings to provide information about Site C construction activities, including schedule, impacts and duration of work. The meetings will also provide an opportunity for BC Hydro to answer questions, gather feedback and hear about concerns.	The Site C team provided 13 presentations and hosted 14 tours. No public meetings were required. Please see Appendix H for more information.
Council Presentations and Meetings	Project team representatives will continue to provide updates to local and regional government councils on major project milestones and construction-related activities.	The Site C team provided one presentation to city or district councils or boards during the reporting period. Please see Appendix I for more information.
Community Liaison Committees	During the construction phase, BC Hydro will establish Community Liaison Committees. The Committees will provide an opportunity to BC Hydro to keep communities informed of project activities, as well as to answer questions and hear about concerns.	One Regional Community Liaison Committee (RCLC) meeting was held during this period, on November 27, 2024. This was the final RCLC meeting for the project. Please see Appendix J for more information.

Appendix A. Project Website

The project website (www.sitecproject.com) was frequently updated over the course of the seventh year of construction. Updates include information about construction activities, procurements, business opportunities, employment, as well as maps, reports, permits and authorizations.

Specific updates include:

- Regular updates to the [Construction Activities](#) page.
- Regular updates to the [Photo Gallery](#).
- Regular updates to the [Project Videos](#) page, [including drone videos](#).
- Updates as required to the [Reservoir filling](#) section.
- Updates as required to the [Boating and Future Reservoir Access](#) page.
- Frequent updates to the [Employment Statistics](#) page.
- A new [Indigenous Traditional Use Fund](#) page.
- A new [Site C Agricultural Leases](#) page
- A frequently updated [News, Reports and Advisories](#) section that includes construction-related information, public advisories, information sheets, funding announcements, notices of public information sessions, and reports to the BC Utilities Commission, project milestones, and project updates.

Reservoir safety

Although the Site C reservoir is full, we continue to strongly urge people to stay off the water and away from the shoreline. Here's a video explaining how we're monitoring the surrounding slopes for movement.

Appendix B. Public Enquiry Program

Public enquiries can be provided to the Site C project team by toll-free phone line, email, an online feedback form, by fax and in person at events and at the Fort St. John Community Consultation Office (by appointment).

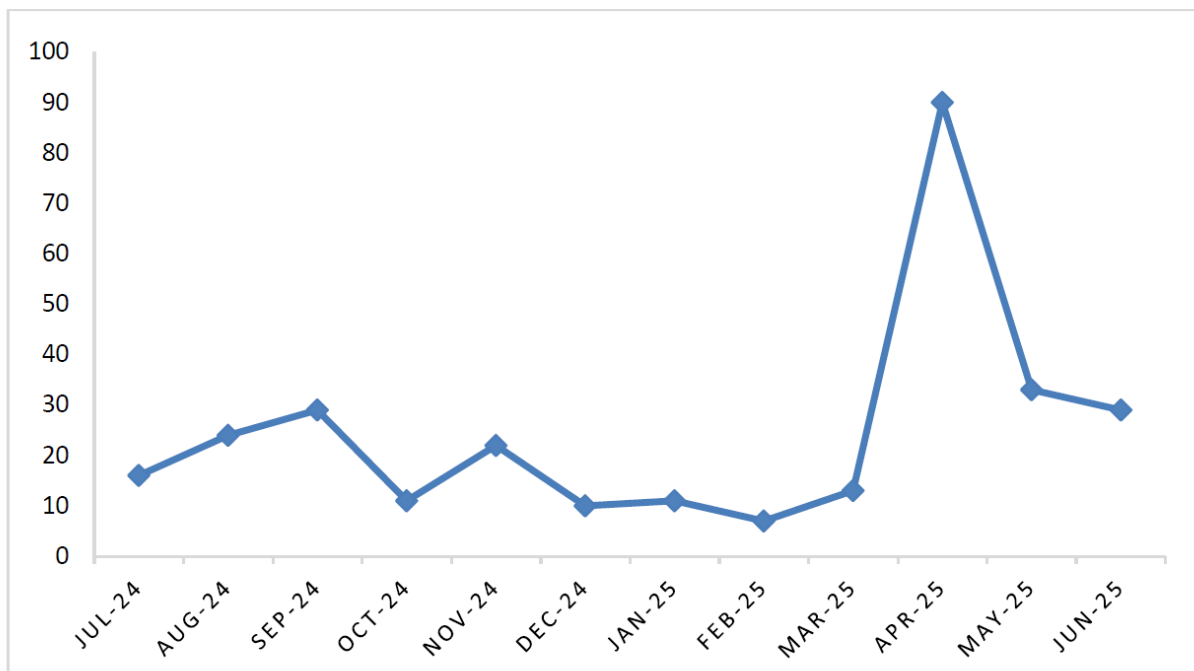

The Site C communications team monitors all communications channels (listed above) and tracks, reviews and responds to all public enquiries.

Please see the next several pages for the **BC Hydro Public Enquiries Report** for the period of **July 1, 2024 – June 30, 2025**.

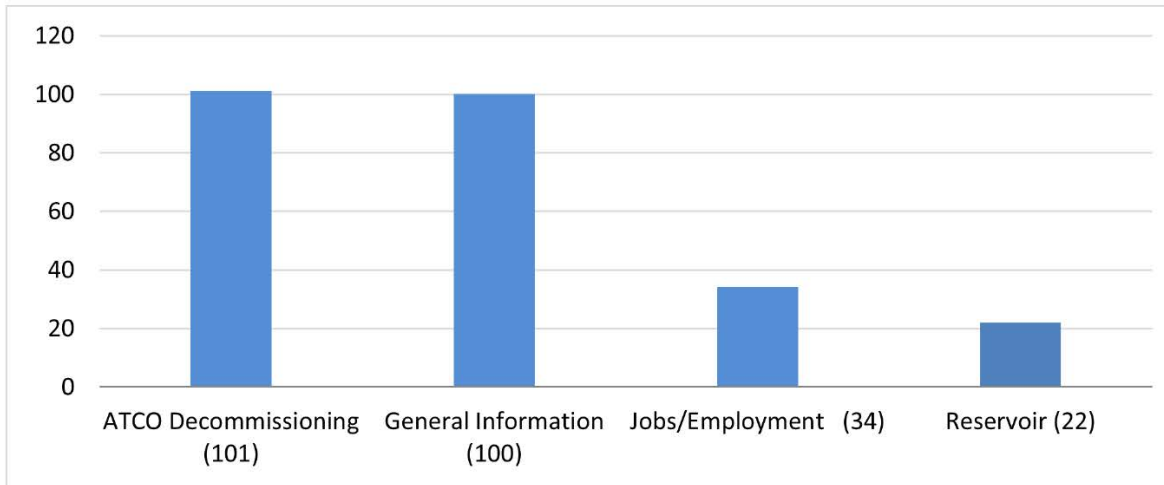

- **295 total enquiries were received between July 2024 – June 2025**
- Of these, the **top enquiry topics** were:
 - 1) **ATCO Decommissioning: 101 enquiries (34%)**
 - 2) **General Information: 100 enquiries (34%)**
 - 3) **Jobs/Employment: 34 enquiries (12%)**
 - 4) **Reservoir: 22 enquiries (7%)**

Appendix C. Construction Bulletins

Regular, biweekly construction bulletins were produced until December 13, 2024. They provided a two-week look ahead of upcoming construction activities, including potential impacts and duration.

The bulletins are [posted to the project website](#) and were sent to 5,933 subscribers, media, local and regional government contacts and other stakeholders.

Additional bulletins were developed and distributed during reservoir filling, focused on progress updates and public safety.

In the reporting period, 14 bulletins were sent out and posted online.

The Dec. 13, 2024 construction bulletin was the final issue on the project.

All files can be found here: <https://www.sitecproject.com/construction-activities/construction-bulletins>.

Appendix D. Letters, Emails and Mailings

Letters, emails and mailings are used to provide information about construction activities that may impact a small area or specific group of residents. During the 10th year of construction, information was communicated by email.

[Communications with the community of Old Fort](#) included:

- July 18, 2024: Email communication about the temporary overnight closure of Old Fort Road.
- August 14, 2024: Email communication with a reservoir filling update.
- August 27, 2024: Email communication about reservoir filling underway.
- May 2, 2025: Email communication about construction site re-vegetation work and acoustic bird deterrents.
- June 28 2025: Email communication about testing for the warning system at the dam.
- June 30, 2025: Email communication about testing for the warning system at the dam.

Information items were also shared with Indigenous Nations and local government contacts, as appropriate. Communications to the Regional Community Liaison Committee are found in the RCLC Annual Report.

In addition, construction notification letters were produced quarterly, providing an overview of construction activities that can be expected over the course of the quarter (three-month period). They were emailed to Indigenous Nations and local governments and posted on the Site C website.

- [August 30, 2024](#)
- [November 29, 2024](#)

The Nov. 29, 2024 letter was the final letter on the project.

Appendix E. Information Materials

Information materials were developed in the past year. These items are distributed using a variety of methods, including posting to the project website and distribution by email to the public, local stakeholders, and Indigenous Nations, as appropriate.

These include:

- **Information Sheets:** New or updated information sheets were posted to the project website. They are available here: <https://www.sitecproject.com/news-and-information/information-sheets>.
- **Photos:** More than 190 photos were posted to the Site C website during this reporting period. They are available here: <https://www.sitecproject.com/construction-activities/photo-and-video-gallery>.
- **Videos:** Two videos were posted to the Site C website during this reporting period. They are available here: <https://www.sitecproject.com/news-and-information/project-videos>.

Appendix F. Media Relations

The biweekly construction bulletin was shared with media outlets.

In addition, 10 news releases and information bulletins on a variety of topics were issued throughout the 10th year of construction, including:

- Information about reservoir filling.
- Construction milestones such as completion of reservoir filling and generating units coming into service.
- Information about community benefits and project mitigation measures.
- Site C updates regarding construction, employment statistics, or other relevant information.

All releases, bulletins and advisories are available here: <https://www.sitecproject.com/news-and-information>.

Appendix G. Social Media

During the reporting period, the [@sitecproject](https://twitter.com/sitecproject) X account posted 50 tweets.

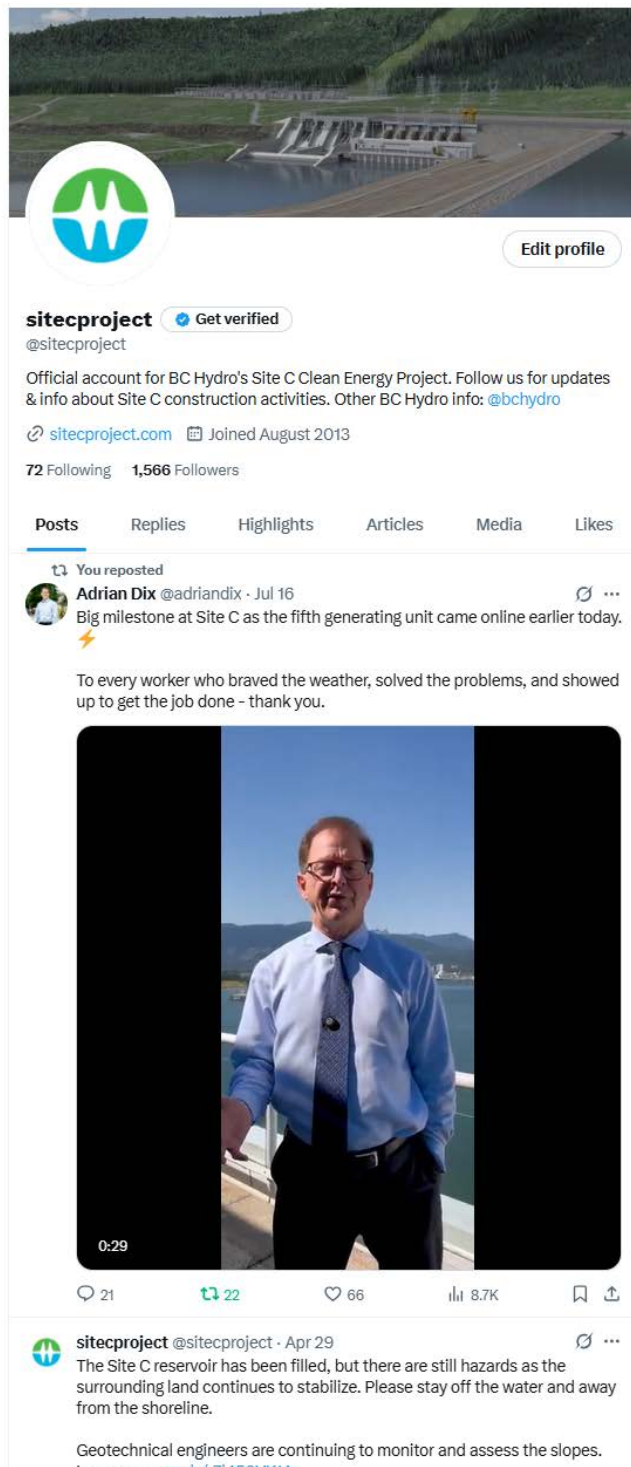

Topics included:

- Construction progress updates and milestones
- Reservoir filling progress updates
- Community benefits and project mitigation measures
- Videos and photography of the project
- Peace River access and public safety information
- Operational updates

- Indigenous and community engagement

The account currently has 1,566 followers.

Appendix H. Open Houses, Community Events, Presentations and Tours

Where possible BC Hydro provided presentations and tours during the reporting period.

BC Hydro provided Site C construction update presentations to the following committees/groups/organizations. Note that not all meetings were public.

- August 27, 2024: Dawson Creek Rotary Club
- October 26, 2024: Vancouver Power Pioneers
- November 15, 2024: Inside Education & Fort St John area high school students
- November 19, 2024: McLeod Lake Indian Band Working Group
- November 22, 2024: Peace River/Williston Reservoir Advisory Committee
- November 27, 2024: Site C Regional Community Liaison Committee
- December 10, 2024: Fort Chipewyan Métis Nation staff
- December 10, 2024: Pacific Energy Innovation Association
- February 19, 2025: Fort Chipewyan Métis Nation staff
- February 21, 2025: Peace River/Williston Reservoir Advisory Committee
- March 19, 2025: Fort St John Sunrise Rotary Club
- June 6, 2025: Peace River/Williston Reservoir Advisory Committee
- June 19, 2025: McLeod Lake Indian Band Working Group

BC Hydro organized and conducted the following tours of the Site C construction area:

- July 10, 2024: Ministry of Transportation
- July 18, 2024: Northern Regional Construction Association
- August 1, 2024: Peace Region media
- August 15, 2024: Town of Peace River staff
- September 13, 2024: Canadian Armed Forces regional liaison officers
- September 17, 2024: CBC National media tour
- September 25, 2025: BC Ministry of Environment Climate Action Secretariat
- November 26, 2024: CBC Radio-Canada media tour
- January 31, 2025: Minister of Energy and Climate Solutions
- February 26, 2025: Waterpower Canada Board

- April 30, 2025: Resource Works
- May 21, 2025: North River Midstream
- May 28, 2025: Environmental Forum
- June 24, 2025: Peace River Regional District Board

Appendix I. Council Presentations and Meetings

The Site C team provided presentations to or attended meetings with city or district councils or boards during the reporting period as follows:

- June 24, 2025: Peace River Regional District Board presentation/tour of Site C Worker Accommodation

Appendix J. Regional Community Liaison Committee

A Regional Community Liaison Committee (RCLC) was created and provides a forum for BC Hydro and elected officials to share information and discuss community interests, enquiries and potential benefits related to the project.

BC Hydro established the RCLC during project construction to foster dialogue between BC Hydro, Peace Region local governments and Indigenous Nations. The RCLC provides awareness of construction activities, construction schedules, local interests (including procurement and employment opportunities), enquiries and concerns, and encourages participation and input from RCLC representatives. The RCLC acts as an advisory committee to BC Hydro.

One virtual meeting was held on November 27, 2024. This was the Site C project's final formal meeting with RCLC.

Meeting minutes can be found [online](#).

Appendix K. Advertising

In this reporting period, the Site C project advertised to notify the public about upcoming construction work, safety programs, community impacts, information sessions, and permit applications, as needed:

Newspaper ads

- July 1, 2024 to August 9, 2024: Weekly advertisements were placed in Coffee Talk Express and the Prince George Citizen and monthly advertisements were placed in the Hudson's Hope Bulletin to share information about reservoir filling and boater access.
- August, 2024: One advertisement was placed in the Hudson's Hope Bulletin to remind people not to hunt or discharge firearms in Site C project areas.
- August 15, 2024 to August 25, 2024: Weekly advertisements were placed in Coffee Talk Express and the Prince George Citizen to share information about reservoir filling and public safety.

- August 25, 2024 to November 6, 2024: Weekly advertisements were placed in Coffee Talk Express and the Prince George Citizen and monthly advertisements were placed in the Hudson's Hope Bulletin to advise that reservoir filling was underway and to share information about public safety.
- November 14, 2024 to December 19, 2024: Weekly advertisements were placed in Coffee Talk Express and the Prince George Citizen to share information about public safety around the new reservoir.
- April 23, 2025 to June 25, 2025: Weekly advertisements were placed in Coffee Talk Express and monthly advertisements were placed in the Hudson's Hope Bulletin to share information about public safety around the new reservoir.

Radio ads

- July 29, 2024 to August 24, 2024: Radio ads aired 2-3 times per day on on MOVE 98.5 (CHRX), BOUNCE 101.5 (CKNL), Moose FM 100.1 (CKFU), The GOAT (CIRX), Rewind Radio (CKDV), Big Country Radio (CJXX) and 989 Rewind Radio (CIKT) sharing information about boat launch access on the Peace River, reservoir filling, and public safety.
- August 25, 2024 to September 25, 2024: Radio ads aired 3 times per day on MOVE 98.5 (CHRX), BOUNCE 101.5 (CKNL) and Moose FM 100.1 (CKFU); and 2 times per day on The GOAT (CIRX), Rewind Radio (CKDV), Big Country Radio (CJXX) and 989 Rewind Radio (CIKT) to advise that Site C reservoir filling was underway, share information about boat launch access, and communicate public safety messaging.
- November 18, 2024 to December 31, 2024: Radio ads aired once per day on MOVE 98.5 (CHRX), BOUNCE 101.5 (CKNL) and Moose FM 100.1 (CKFU) to share information about public safety along the new reservoir.
- April 21, 2025 to June 27, 2025: Radio ads aired once per day on MOVE 98.5 (CHRX), BOUNCE 101.5 (CKNL) and Moose FM 100.1 (CKFU) to share information about public safety along the new reservoir.

Online ads

- July 22, 2024: An advertisement was placed on EnergeticCity.ca to remind people not to hunt or discharge firearms in Site C project areas.
- July 1, 2024 to August 11, 2024: An advertisement was placed on BC Hydro's Facebook page and geo-targeted to Fort St. John, Hudson's Hope, Taylor, Chetwynd, Dawson Creek, and Prince George to share information about boater access along the Peace River and reservoir filling timing.
- August 12, 2024 to August 25, 2024: An advertisement was placed on BC Hydro's Facebook page and geo-targeted to Fort St. John, Hudson's Hope, Taylor, Chetwynd, Dawson Creek, and Prince George to share information about reservoir filling, boater access, and public safety.
- August 26, 2024: An advertisement was placed on EnergeticCity.ca to advise that reservoir filling was underway and to share information about public safety.
- August 26, 2024 to November 8, 2024: An advertisement was placed on BC Hydro's Facebook page and geo-targeted to Fort St. John, Hudson's Hope, Taylor, Chetwynd,

Dawson Creek, and Prince George to advise that reservoir filling was underway and to share information about public safety.

- November 12, 2024 to December 31, 2024: An advertisement was placed on BC Hydro's Facebook page and geo-targeted to Fort St. John, Hudson's Hope, Taylor, Chetwynd, Dawson Creek, and Prince George. The ad shared information about public safety around the new reservoir.
- April 17, 2025: A post was placed on BC Hydro's Facebook page and geo-targeted to Fort St. John, Hudson's Hope, Taylor, Chetwynd, Dawson Creek, and Prince George. The post shared information about public safety around the new reservoir.
- April 23, 2025: An advertisement was placed on EnergeticCity.ca to share information about public safety around the new reservoir.
