## APPENDIX D SPECIFICATIONS FOR BEAVER DAM REMOVAL

### PERMIT FJ23-790246 Amended July 24, 2023

1. Use Beaver Dam Best Management Practices:  
<http://www.env.gov.bc.ca/wld/documents/bmp/iswstdsbpsmarch2004.pdf> (See Section 7.6.3 therein)
2. The removal of the dam(s) must be completed in a controlled manner and undertaken in a series of 20 cm drops in dam height. After each drop-in dam height, the subsequent water level and sediment plume must be allowed to stabilize prior to the next level drop, thereby allowing for a controlled breach and controlled flows downstream
3. When the water level in the reservoir has been lowered to the extent that no undue scour of the stream channel will occur, the dam may then be breached, and the dam debris removed with mechanical equipment or by hand.
4. All waters users in downstream areas of the stream must be notified prior to the removal of the beaver dam.
5. All material excavated from the dam(s) must be sidecast/removed from the area in such a manner that it is prevented from re-entering the watercourse.
6. Machinery (where used) must be free of excess oil and grease and have no hydraulic fluid leaks; only the digging bucket from the machinery arm may enter any watercourse.
7. Care must be exercised during all phases of removal of the dam(s) to minimized sediment introduction to any watercourse.
8. All reasonable care must be exercised to avoid damaging any land, works, trees, stream banks or other property. The permit holder must make full compensation to the owners for any damage resulting from the removal of any beaver dam(s).
9. Written permission for access to or travel through any private land must be obtained from all property owners prior to beginning any dam removal.
10. Where there is a series of dams, only one dam at a time may be removed. The permit holder will begin with the most downstream dam and progress upstream.
11. Other methods to reduce or eliminate flooding problems caused by beavers should also be considered. These can include installation of beaver stops, fencing, or snorkel devices.
