

FIELD STUDIES INFORMATION SHEET

June 2010 – BC Hydro Geotechnical Studies

BC Hydro is conducting geotechnical studies on the Moberly River and Peace River in June as part of Stage 3 of the Site C Clean Energy Project.

From **June 16 – 19**, BC Hydro will be conducting a survey of bedrock elevations on the Moberly River. Access to the site will be by helicopter and boat. The work will involve visual inspection and geomatic surveys of bedrock outcrops to gather geologic information in the area.

From **June 21 – 25**, BC Hydro will be reading reservoir slope instrumentation along both banks of the Peace River between the proposed dam site and the Peace Canyon Dam. Access to the area will be by helicopter and vehicle. Private property will not be accessed.

Field study updates are available at www.bchydro.com/sitec and in the Community Consultation offices in Fort St. John and Hudson's Hope.
